

STARHOTELS “GRAND MILAN” THE 22ND STAR OF STARHOTELS SHINES IN SARONNO, IN THE HEART OF THE BUSINESS WORLD

248 rooms, 6 meeting rooms, a restaurant for 265 people

Starhotels Grand Milan in Saronno is a Hotel with great accommodation and strategic potential. Its size and technologic services make the Hotel an avant-garde structure in the Congress and Hotel Business. Moreover, its location underlines its important central position with respect both to the main airports and train stations of the metropolitan area of Milan and to the development of the Fair Centers of Milan and Rho/Pero.

As underlined by Ms. **Elisabetta Fabri**, Vice President and Managing Director of the Group, *“thanks to the new management, Starhotels is able to differentiate its expansion plan. Ever since its was founded 27 years ago, the Company has always bought its Hotels (21 out of its 22 Hotels are owned directly by the Company). The Saronno project has allowed us to implement new development strategies, in line with the Group’s philosophy.*

As a matter of fact, one of our strengths is to be able to choose structures strategically located in the heart of cities or within easy reach, well connected to communication networks and to the most important business areas. Saronno perfectly hits our target”.

Starhotels Grand Milan is in the city of Saronno, not far from its centre, only 250 metres from the Train Station and a few minutes from the new Rho Pero Fair, between Milan and Malpensa International Airport. Saronno is, in fact, the only train stop on the route of the express train Milan-Cadorna/Malpensa (after only 20 minutes), reaching Malpensa International Airport after 18 minutes. The new Starhotels will be connected to the Train Station by way of a long portico, which will allow guests to reach the Hotel out of the rain.

Starhotels Grand Milan is stunning for its striking congress vocation, offering excellent congress and fair infrastructures, as well as functionality and cutting-edge technology.

Its futuristic structure is made of two 9-floor buildings joined by a central tower with 3 lifts. Its façade was designed by the renown Architect Mr. Mario Botta. The interior design is by Architect Lorenzo Bellini.

Large open spaces are well integrated so as to give life to environments whose different styles are perfectly combined into a learned and elegant eclecticism, with welcoming atmospheres and unique details. A dynamic and strongly characterized “stage”, suiting itself to its guests and inviting them to be its “actors/spectators”.

The Hotel has 201 rooms, 47 residences, 1 Congress Centre with 10 meeting rooms for up to 370 people, a Business Centre and Internet Point, Wi-Fi Internet throughout the Hotel, a Restaurant for 265 people (with a smoking area and a garden), a large bar, and a cigar room. The following services and structures will soon be available: a SPA with sauna, Turkish bath, kneipp / kinesis, a Technogym-equipped gym, massage rooms, solarium, a swimming pool on the 9th floor with jet for against-the-stream swimming, and access to a large Roof. Lastly, the Hotel has an outdoor car park for 28 cars and a private garage for more than 200 cars.

The future is now: with Starhotels Grand Milan in Saronno, the Company shows its forward-looking approach to conquering the market, with a Hotel which will be able to satisfy the commercial challenges of the next few years and the enlargement of the Rho Pero Fair.
